Guidelines:

An Electrical Inspection must be performed by an Electrical Underwriter Inspector. Pools must be constructed only on the same lot as the principal structure in the rear or side yard of such structure.

The swimming pool shall be constructed at a distance not less than 10 feet from the edge of water from the rear lot lines or buffer zone, where applicable, nor less than 10 feet from the side lot line or buffer zone where applicable.

All private in ground swimming pools shall be enclosed by a permanent fence of durable material at least four feet in height. Such fence must be installed prior to the beginning of excavation for a pool and continuously maintained throughout construction and subsequent use of the pool. A temporary fence is only sufficient for construction phase purposes only.

It is unlawful to use a swimming pool that has not been inspected and approved by the Town of Stillwater. Violators are subject to penalties prescribed by law.
